# HAND APPLIED BAG CLOSURE-LABELS

## Series P-100

P-100: Front Printed by 884 Thermal Printer

P-100: Back - Custom printed at factory

**SERIES P-100** closure-labels are designed to be printed with Kwik Lok's 884 Thermal Printer. The printer can print bar codes, and other label variables. The P-100 and 884 Printer allow the packager to print their own labels. The back of the label can be preprinted at a Kwik Lok plant with custom graphics. Labels can be printed on our standard C1S Tagboard or a synthetic label material. They are available with the closure openings noted at the bottom of the page. Labels are available in LEFT HAND ONLY.

SEE APPENDIX FOR ADDITIONAL CLOSURE-LABEL PRINTING INFORMATION.

After the closure-labels are printed by the 884 Thermal Printer, they can be separated by Kwik Lok's optional 888A Separator unit that removes the labels from the rolls.

# CLOSURE LABELS FOR BULK FOOD LABELS

## GENERAL INFORMATION

Kwik Lok Corporation manufactures three sizes of closure-labels for supermarket bulk food sections. These labels permit the shopper to close the bag and mark bin numbers on the package.

The Kwik Lok bag closure gives the shopper a convenient and easy method of closing the bag. The label area permits easy marking of the bin number and assures legibility at the check-out stand.

The labels can be custom printed with bar codes, store logos, slogans or other copy and graphics. Contact us for pricing and information regarding custom printed labels.

## LOK OPENING SIZES

Bulk food closures are supplied in either of two opening sizes which will accommodate most bulk food bags.

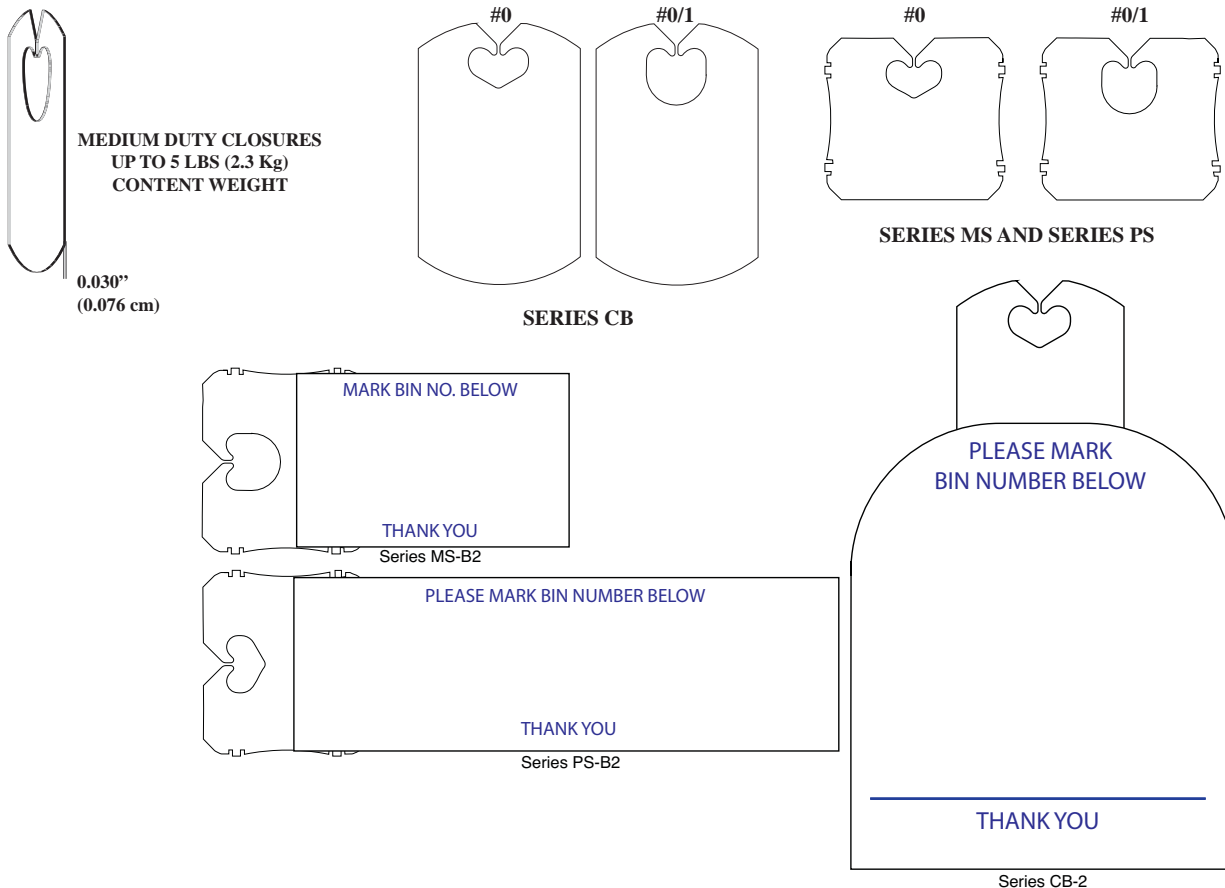

## CLOSURE SPECIFICATIONS

Label Sizes: SERIES CB: 1-15/16" wide by 2-1/4" long (4.92 cm x 5.72 cm)

### 814 Kwik Lok Dispenser

SEE APPENDIX FOR 814 DISPENSER INFORMATION

# Kwik Lok® designed for the consumer

**EASY TO OPEN... EASY TO CLOSE... EASY TO READ**

**TO OPEN**

**TO CLOSE**

A Kwik Lok package is easy to open, no confusing twisted wire to unravel. The all-plastic Kwik Lok closure snaps off in a quick simple motion. Reclosing the bag is just as easy, making your package consumer friendly. Your product and its package are important. Why not use the best closure available?

Consumers are increasingly looking for package information such as “Sell By”, unit price, etc. Kwik Lok allows you to print this information right on the closure. It is always in the same place and easy to read. Information that is overprinted on the bag graphics can be hard to locate and read.

Closure Colors available: ..... **Red, White and Blue**  
(Multi-colored packs are not available)

Packaged: ..... 1,000/roll, 27 rolls per carton (OC-0203) 27M

Minimum Order: ..... 27,000

Approximate Shipping Weight: ..... 27M Pack: 60 Lbs (27.2 Kg)

\*Heavy duty plastic is recommended for net bag openings.

## SEMIAUTOMATIC BAG CLOSURE-LABELS

### Series L

The standard Series L closure-label is printed on coated one-side tagboard. The front of the label is printed on the coated side. The coated side will permit the printing of brighter colors and sharp color illustrations.

Labels that will be printed with a printer mounted on the bag closing machine must be printed with the front on the uncoated side of the tagboard. This permits the ink to absorb into the material and prevents ink smears.

Uncoated papers are absorbent, so inks, varnishes and coatings perform differently than on coated papers. It is generally not a good idea to print four-color illustrations on the uncoated side of our tagboard.

# SEMI-AUTOMATIC BAG CLOSURE-LABELS

## Series U

**SERIES U** closure-labels can be printed in any number of colors on one or both sides. The label can be printed on our standard C1S Tagboard (10 pt, white), or a synthetic label material. It is available with the closure openings noted at the bottom of the page.

SEE APPENDIX FOR ADDITIONAL CLOSURE-LABEL PRINTING INFORMATION.

For bag closing machines: ..... 086

Corner shape of the label may be square or have all corners rounded to a 3/8" (0.95 cm) radius.

**Label Size..... 2-3/4" (6.99 cm) wide x 2-3/4" (6.99 cm) long**

# AUTOMATIC BAG CLOSURE-LABELS

## Series P, PF & P-200

Series J with "I" webbing. Closures are connected by small plastic 'nubs'.

Series J with "NRP" webbing. Closures are connected using a patented 'wing' design.

All lok openings are available with either of the above web designs. All closures are available in either medium duty (0.030"; 0.076 cm thick) or heavy duty (0.045"; 0.114 cm thick) plastic.

**Label Size.....7/8" (2.22 cm) wide x 2-3/4" (6.99 cm) long**

### SERIES P CLOSURE-LABELS

The label can be custom printed on both sides. The closure is glued to the back of the label.

### SERIES PF CLOSURE-LABELS

The label can be custom printed on both sides. The closure is glued to the front of the label.

### SERIES P-200 CLOSURE-LABELS

**Custom Printed Front**

**Back Printed by 884 Thermal Printer**

Series P-200 closure-labels are designed to be printed, by the customer, with the 884 Thermal Printer. After printing, the labels are recoiled, and can be used in appropriate Kwik Lok Bag Closing Machines or the 898 Closure-Printer Separator. The front of the label can be custom printed - this side of the label will face out, away from the package, towards the consumer.

The 884 Print Area is 2-3/16" (5.55 cm) x 3/4" (1.91 cm) Note: The 884 cannot print directly over the closure.

### SERIES PF CLOSURE-LABELS

**Front Printed by 883M Thermal Printer**

**Custom Printed Back**

# AUTOMATIC BAG CLOSURE-LABELS

## Series PFM & PM-200

*Label Size.....7/8" (2.22 cm) wide x 2-3/4" (6.99 cm) long*

### SERIES PFM CLOSURE-LABELS

The label can be custom printed both sides. The closure is glued to the front of the label.

### SERIES PM-200 CLOSURE-LABELS

**Custom Printed Front**

**Back Printed by 884 Thermal Printer**

Series PM-200 closure-labels are designed to be printed, by the customer, with the 884 Thermal Printer. After printing, the labels are recoiled and can be used in one of the Automatic Bag Closing Machines or the 898 Closure-Printer Separator. The front of the label can be custom printed - this side of the label will face out, away from the package, towards the consumer.

884 PRINT AREA: 1-15/16" (4.92 cm) x 3/4" (1.91 cm). The 884 will not print on the material directly above the glued closure. When applied to the package the custom printed side (front) will face out, away from the package, towards the consumer.

### SERIES PFM CLOSURE-LABELS

**Custom Printed Back**

**Front Printed by 883M Thermal Printer**

# AUTOMATIC BAG CLOSURE-LABELS

## Series PFM & PM-200

**SERIES PFM and PM-200** closure-labels can be printed on our standard C1S Tagboard (10 pt, white), or a synthetic label material. They are available with the closure openings noted at the bottom of the page.

SEE APPENDIX FOR ADDITIONAL CLOSURE-LABEL PRINTING INFORMATION.

## APPENDIX

# BAG CLOSURE-LABEL INFORMATION

Kwik Lok can provide complete design services. A design mock-up can be provided at no charge, along with a quotation of all costs. Mock-up can be sent to the customer as a PDF digital file via e-mail. Using electronic PDF files allows fast, easy communications during the design process. A hard copy proof can be furnished as soon as the customer has accepted the final design. Press Proofs can be provided and shipped to the customer. Contact the production plant for Press Proof costs.

Kwik Lok closure-labels are printed on offset lithography presses. Printing inks used are 4-color process; spot colors are limited to Pantone Matching System (PMS) colors. All spot colors must be identified by PMS Numbers. The company contracts printing to outside vendors. Press check by customers, or their agent(s) is permitted and must be pre-arranged. The person making the press check must be authorized to sign-off on the press sheet.

**DIGITAL ARTWORK:** Customers wishing to provide their own art should send files in digital form. Kwik Lok supports the following applications: Adobe Illustrator, Adobe Photoshop and Adobe InDesign. Artwork provided in other formats should be saved as an eps file. Linked files **MUST** be included and provided as esp or tiff files. Files can be furnished on disk or sent by e-mail.

All artwork designed by Kwik Lok will remain the property of Kwik Lok Corporation and held for the exclusive use of the customer as long as the files remain active. Files will be deemed inactive if, during a period of two years, the label(s) have not been ordered. Inactive files will be permanently removed from our servers.

**LABEL MATERIALS:** All Kwik Lok plants stock two basic label materials: Coated one side (C1S) paper tagboard, white, 10pt.; a synthetic material, white, 10 mil. The Yakima plant also has access to coated two-side tagboard, white, 10 pt.

**Special materials:** Generally we do not accept orders calling for specialty materials. All material must be pre-approved by Kwik Lok; samples of special materials must be provided for tests to test compatibility of materials with our production equipment.

**COMBINING LABEL VARIETIES FOR PRICING:** Label orders containing more than one label can be combined for pricing as long as the labels are printed with spot colors and ALL colors remain identical. 4-Color process labels can be combined for pricing as long as the colors remain the same and only the text changes. For example, the labels may go from "Granny Smith" to "Red Delicious" to "Golden".

Labels combined to obtain a lower unit price may be subject to one or more additional charges such as: Press changes, tooling changes, variety changes, etc.

**FLOW DIRECTION:** Some labels must be matched with the Kwik Lok machines that will be used to close the bag using the closure-label. Machines that are designated as **RIGHT HAND** or **LEFT HAND** can only use labels that are produced as **RIGHT HAND** or **LEFT HAND** labels. This information can be obtained from the Kwik Lok machine's serial number plate. The last letter of the **MODEL NUMBER** will be either **R** (right hand) or **L** (left hand). If there is any question, please provide us with the serial number(s) of the machines that will be used to close the bag with the closure-labels being ordered.

**DETERMINE FLOW DIRECTION: 872 & 893 AUTOMATIC MACHINES - ALSO 865 (HORIZONTAL PKGS.)**

**DETERMINE FLOW DIRECTION: 865 AUTOMATIC MACHINES (VERTICAL PACKAGES)**

## APPENDIX

### BAG CLOSURE-LABEL INFORMATION

### BAG CLOSURE-LABEL INFORMATION

#### CODE AREA Series CR, U & L

Kwik Lok's 086 Semiautomatic Bag Closing Machine can be purchased with a printer to print dates, prices, lot codes, etc. on the label as the bags are being closed by the machine. The code area must be kept free of copy and graphics. Code area is shown below.

Code Area Dimensions: 9/16" (1.43 cm) wide x  
7/8" (2.22 cm) long, centered on label.

Note: The printer requires an absorbant surface. The front of the label (facing out towards the consumer) will be printed on the uncoated side of our standard C1S Tagboard.

Custom Printed Side of Label

NO INK AREA  
.25" (.64 cm) X .69" (1.75 cm)

Coated Side of Label for 884 Printer Use

Bleed Area: 1.13" (2.87 cm) x 3.00" (7.62 cm)

The P-100 is designed to be run through Kwik Lok's 884 Thermal Printer. The roll (as it comes from the factory) will have the coated side of the label facing up. This is the side on which the 884 will print.

After the closure-labels are printed by the 884 Thermal Printer, they can be separated.

Note: Kwik Lok's standard label material is a coated one-side tagboard ... the 884 MUST print on a coated side. Order coated two-side tagboard if the graphics on the custom printed side of label require coated paper.

## Series P-200 Left Hand

Label Size: 7/8" (2.24 cm) wide x 2-3/4" (6.99 cm) long

The P-200 is designed to be run through Kwik Lok's 884 Thermal Printer. The roll (as it comes from the factory) will have the back of the label facing up. This is the side on which the 884 will print.

Upon exiting the 884 the printed labels will either be run through a separator for hand closing applications ... or recoiled for use in the 865 Automatic Bag Closing Machine. When recoiled and placed on the 865, the front of the label will be facing out, away from the package (the side that will be seen by the consumer).

Note: Kwik Lok's standard label material is a coated one-side tagboard ... the 884 MUST print on a coated side. Order coated two-side tagboard if the graphics on the front require coated paper.

## Series P-200 Right Hand

Label Size: 7/8" (2.24 cm) wide x 2-3/4" (6.99 cm) long

## Series PM-200 Left Hand

Label Size: 7/8" (2.24 cm) wide x 2-3/4" (6.99 cm) long

The PM-200 is designed to be run through Kwik Lok's 884 Thermal Printer. The roll (as it comes from the factory) will have the back of the label facing up. This is the side on which the 884 will print.

Upon exiting the 884 the printed labels will either be run through a separator for hand closing applications ... or recoiled for use in the 865 Automatic Bag Closing Machine. When recoiled and placed on the 865, the front of the label will be facing out, away from the package (the side that will be seen by the consumer).

Note: Kwik Lok's standard label material is a coated one-side tagboard ... the 884 MUST print on a coated side. Order coated two-side tagboard if the graphics on the front require coated paper.

Corners can be Square or with 3/8" (.95 cm) Radius

## APPENDIX

### 63-DJ AND 64-DV DISPENSER

The **63-DJ and 64-DV Dispensers** are inexpensive, portable, “table-top” models constructed of ABS plastic. With no moving parts, the units are virtually maintenance free and extremely simple to use.

GP-1

**63-DJ uses the DJ Closure.**

GP-0

**64-DV uses the DV Closure.**

#### DISPENSER SPECIFICATIONS

Size: ..... 9” (22.86 cm) wide x 10-3/4” (27.31 cm) long x 4-1/4” (10.80 cm) high  
Material: ..... ABS Plastic  
Approximate Shipping Weight: (2 per carton).....4 Lbs (1.8 Kg.)

## APPENDIX

### 68-DJ AND 69-DV ISLAND DISPENSER

The **68-DJ and 69-DV Dispensers** are models designed to sit under roll stock in the produce department.

**68-DJ uses the DJ Closure.**

**69-DV uses the DV Closure.**

## APPENDIX

### 70-DJ AND 71-DV VALANCE DISPENSER

The **70-DJ and 71-DV Dispensers** are designed to be attached to the valance in the produce department. It can be attached on the face or on the top of the valance.

**70-DJ uses the DJ Closure.**

**71-DV uses the DV Closure.**

## APPENDIX

### 72 BULK DISPENSER CUP

The **72 Dispenser** allows closures or closure-labels to be placed loose in the 72 'Cup' Dispenser.

The 72 Dispenser uses any of the following:

- A and F Closures
- AM Closures
- AA, AB and FA Closures
- CB-2 Closure-Labels
- MS-B2 Closure-Labels
- PS-B2 Closure-Labels

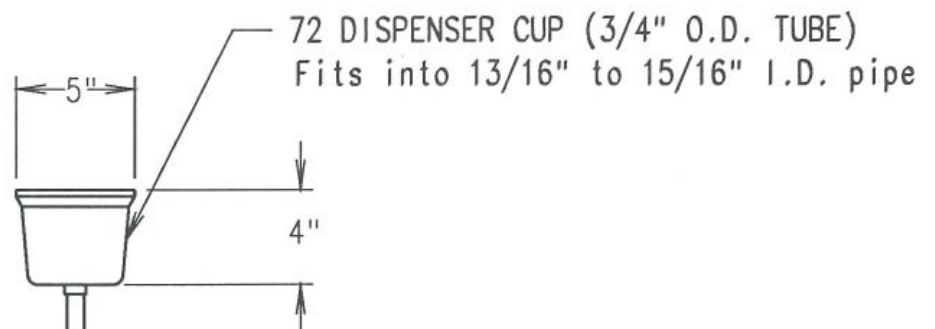

ILLUSTRATION H (TOP OF ROLL BAG)

## APPENDIX

### 76A AND 76B DISPENSERS

The **76A Valance Dispenser** can be directly attached to the valance in the produce department.

The **76B Island Dispenser** can be attached to the roll stock stand with one of two brackets listed below.

The **76A and 76B Dispensers** use C and CB-2 Closure Labels

Series CB-2

## APPENDIX

### 76A AND 76B DISPENSERS

The **76B Valance Dispenser** can be mounted in the produce department three different ways, shown below.

#### 76B-VALANCE INSTALLATIONS

## APPENDIX

### 814 PRODUCE DISPENSER KIT

The **Type 814 Dispenser** is constructed of virtually unbreakable ABS plastic. They can be mounted to any flat, clean surface using double-sided tape (provided).

The 814 can be used with any of the following:

- AA Closures
- AB Closures
- AD Closures
- CA Closure-Label
- CB-2R Closure Label
- VA Closures

**814 Kwik Lok Dispenser**

#### 814B w/826 ADAPTER BRACKET SET

The **826 Adapter Bracket Set** permits the 814 Dispenser to be installed on existing roll bag mounts. Two or four bolts (depending on roll bag mount) quickly secures the adapter bracket to the mount. Two self-tapping screws attach the dispenser to the brackets.

#### 861 ADAPTER BRACKET SET

The **861 Adapter Bracket Set** permits the 814 Dispenser to be mounted on Island Bag Stands.

The 861 fits stands with a 3/4" O.D. (1.9 cm) pipe; the 861-B fits stands with a 7/8" (2.22 cm) pipe.

## APPENDIX

### 814 PRODUCE DISPENSER KIT

814B with 075 VALANCE MT BRACKET-FACE

The **074 (top)** and **075 (face)** Valance Brackets allow the 814 Dispenser to be directly mounted to the top or face of the valance above the produce.

#### 074 and 075 VALANCE INSTALLATIONS

## APPENDIX BAG SIZING

Kwik Lok Corporation assumes no responsibility regarding the suitability of the bags for their intended application. To avoid costly errors, it is recommended that the bag sizes be carefully selected and the initial orders kept to the minimum quantity pending confirmation of acceptable operation and finished package appearance.

To assist you in the selection of bags, the following information is offered:

### BAG WIDTH:

Add the width of product + the height of product + 1/2" (12.7mm).

### BAG LENGTH FORMULAS:

To determine the proper bag length for a consistently shaped product (e.g. Bread, Bun Clusters, Trays, English Muffins, etc.) follow this formula:

**TOTAL BAG LENGTH = PRODUCT LENGTH + 1/2 DIAGONAL LENGTH OF THE PACKAGE END  
+ 4 INCHES (101.6MM) (Not including the wicket lip)**

To determine the proper bag length for a loose bulk product (e.g. Oranges, Potatoes, Sugar, Ice, Macaroni, etc.) follow this procedure.

1. Fill bag to desired weight using samples of the product.
2. Close bag with the proper Kwik Lok® Closure.
3. Check the length of the bag above the closure. The proper bag length would allow 4 inches (101.6mm) above the closure (not including the wicket lip.)

**NOTE:** Normal variations in size and density of products will occur. Oranges, grapefruit, and potatoes will dehydrate as the season progresses; bakery products vary due to over proofing; and density of ice will change because of certain manufacturing techniques. Therefore these bag length formulas take into account these variations to give maximum automatic bag closing dependability.

### BAG GUSSETT:

The bag gussett is 1/2 of the product height.

### BAG THICKNESS:

The thickness of the bag is dictated by several factors. The type and weight of the product is a consideration as well as the quality of the final product as determined by the customer. Thickness ranges are as follows (but not limited to):

- Bakery: 0.75 to 2.0 mil (19.05 to 50.8 micron)
- Produce: 1.0 to 2.5 mil (25.4 to 63.5 micron)
- Bulk Produce: 2.0 to 4.0 mil (50.8 to 101.6 micron)
- Ice: 1.25 to 2.25 mil (31.75 to 57.15 micron)
- General packaging: 0.5 to 3.5 mil (12.7 to 88.9 micron)

## APPENDIX

### BAG SIZING (WICKET)

#### WICKET:

While the number of bags on a wicket can vary, it is preferable to wicket no more than 500 bags at one time. This ensures easier loading, and avoids the lumping resulting from the four layers of bag at the gusset section of the bags. For some thicker film bags, the maximum number of bags per wicket will be lower. The film should be free to slide up the wicket as bags are depleted. Special attention should be made as to how the bags are loaded on the wicket.

#### WICKET DETAIL

## APPENDIX

# BAG SIZING: LOK OPENING SIZE

The purpose of this article is to provide an aid in the selection of a closure opening for a particular size and type of bag. This article contains a chart that places similar sized openings into groups, and two charts that are used to determine which group a bag fits into. There is also a listing of bag types with generalized notes on closure opening recommendations.

Note: Polyethylene bags differ depending on what agents are added to the resin and what coatings/printing are applied. These variables can impact the ability of the Closer to pack a bag into what would appear to be the proper opening. Due to the potential inaccuracies of the charts, methods of closing and bag variables, this article is only an aid in determining closure opening selection. Official bag sizing recommendations must originate from Kwik Lok Yakima.

Chart 1: All of the available openings are placed in order, beginning with the smallest on the left and ending with the largest on the right. The order of arrangement is determined by the lok opening size. The majority of the openings are placed into groups. Charts 2 and 3 refer back to these Groups.

Chart 2: Use this chart for sizing small to medium sized polyethylene type bags. As an example: A bag with a width of 12 inches (30.5 cm) x 1.5 mil (38.1 microns) falls into Group C. From Chart 1, select the opening from Group C depending on the method of application. Opening #1 for hand applied, Opening GP-3 for Semiautomatic closing and Opening TGR-3 for Automatic closing.

Chart 3: Use this chart for sizing heavy mil and wide polyethylene type bags. See Chart 2 paragraph above for usage information.

Bag Type: General Information

CLAF (Full): Generally closed with a KM-NRP or Z-NRP TGR opening.

CLAF (Partial): This type of bag is of CLAF material with an all polyethylene top. Use Charts 2 and 3. However, the closure opening will not accommodate the CLAF material that can occur if attempting to close a tight package.

Drawstring: (Example: Leno onion bag) Three net openings (N-0, N-0/1 and N-1) are used to close drawstrings depending on size of string and available opening in a chosen series. See 'Mesh' below.

Foil: (Example: Bread Bag) Use Charts 2 and 3. Increase the opening size recommendation by one group.

Leno: This rather stiff mesh material requires a large opening. Generally a Z-NRP #6 is used.

Mesh: (Example: soft knitted net potato bag) Generally closed with a K-NRP or KM-NRP TGR type opening. Note: When replacing a drawstring with a closure, it is not recommended that the length of the bag needs to be increased so that there is enough bag top for the Closer to work with.

Paper: (Paper-poly combo): (Example: Bread Bag) Generally a KW-NRP R5B closure is recommended, and in some cases the KM-NRP TGR-6 is utilized.

Polyethylene: (Example: Standard U.S. bread bags) Use Charts 2 and 3.

Polyethylene w/anti (low)-slip agent: (Example: 20 Lb carrot bag) Use Charts 2 and 3. Increase the opening size recommendation by one group if sizing for an automatic closer.

Polyethylene for ice bags (or other cold room environments): Use Charts 2 and 3. Increase the opening size recommendation by one group if sizing for an automatic closer. It is not mandatory, but recommended, to use an opening without side-teeth (Example: Instead of a TGR-5 use a #3 opening).

Polyethylene Master: (Example: Twin-packed bread bag) Typically a KM-NRP TGR-6 or a Z-NRP TG-7 closure is used to close the outer bag of a multiple bread loaf package. The large opening size is used to accommodate up to all bag necks, which includes the inner bags.

Polypropylene: (Example: Bag produced by a Vertical Form and Fill Machine) Use Charts 2 and 3. Increase the opening size recommended closure by two groups. A bag width of 12 inches (30.5 cm) x 1.5 mil (38.1 microns) falls into Group C (TGR-3), but the recommended closure opening is increased to Group E (TGR-5).

Vexar/Extruded Net: These bags are closed with any of the N-style openings. It is best to select the tightest opening possible. It is also recommended that, in most cases, heavy duty plastic be specified.

## APPENDIX

# TERMS AND CONDITIONS

**TERMS:** All Kwik Lok Products are sold Ex Works. Terms available on approved credit are net cash 30 days. Custom printed closure-labels, automatic equipment and large volume orders may require payment in advance

**CLOSURE WARRANTY:** Closures are warranted to be free of manufacturing defects. Closures are guaranteed to be usable for one-year after manufacturing date. Closure-label warranty is void if closure-labels are stored at temperatures below 32°F (0°C) or over 100°F (37.8°C). We do not suggest closure-labels be stored in metal sheds or buildings that are not adequately protected from heat.

### RETURN POLICY FOR CLOSURES AND CLOSURE-LABELS:

Kwik Lok Corporation understands that sometimes products do not fit the needs of our customers for one reason or another. Therefore, when requesting to return products, we ask that you follow the steps outlined below.

#### 1. Before you return products:

Most product issues can be resolved by contacting a Kwik Lok Customer Service Representative. Credit will be issued for acceptable product returns. In this event you will need to receive pre-approval and obtain a valid Return Material Authorization (RMA). The RMA number must be issued from the facility that the closures/closure-labels were originally invoiced from.

- No returns will be accepted without a valid RMA.
- Return Material Authorizations are valid for 30 days.

#### 2. Acceptable product returns:

- Products must be returned in resalable condition.
- All products must be in original Kwik Lok cartons.
- No damaged, partial or open cartons will be accepted.
- All shipping documents, correspondence, Bill of Lading and cartons should include the RMA number.
- No custom orders, such as pre-printed labels, are refundable other than for reasons of defects.
- Unless otherwise stated, all returns or exchanges must be shipped prepaid.

#### 3. Restocking fees and rejected returns:

- All product returns for reasons other than order processing errors or production defects are subject to a 15% restocking fee.
- Kwik Lok reserves the right to refuse return shipment of damaged product.
- Products arriving at any Kwik Lok factory without pre-approval and an RMA number will be refused and returned to shipper.
